Fall 2010 Student Age Distribution Summary

The wide variety of academic programs, schedules, and delivery modalities provided by Indiana Wesleyan University allows the university to meet the academic needs of students in all life situations. Few illustrations of the resulting diversity of the IWU student body are as profound as that of student age - the oldest student taking classes at IWU this year is almost five times the age of the youngest.

The age data cited here are drawn from the Fall 2010 enrollment census files, which in turn draw the data from the IWU data warehouse, STUDENT_DIM, STU_AGE. Students enrolled in LDR-150 through the Center for Life Calling and Leadership's High School Institute and students of undeclared age are not included in these counts.
