Marion Campus May and Summer Enrollment

Cohort-model programs for working adults follow a non-term schedule of essentially continuous enrollment throughout the year. Conversely, most programs on the Marion, IN campus follow a traditional academic calendar of fall and spring semesters with optional May and summer sessions. This document provides basic enrollment counts for the May and summer sessions.

Four different terms are chronicled:

May Term is a 3-week session during the month of May. Students are permitted to enroll for up to four credits during May Term.

Summer Session I (SS I) is a 5-week session occupying roughly the month of June. Students are permitted to enroll for up to six credits during Summer Session I.

Summer Session II (SS II) is a 5-week session occupying roughly the month of July. Students are permitted to enroll for up to six credits during Summer Session II.

Summer Term was invented in 2007 to accommodate summer courses and learning experiences, such as internships, that span longer periods up to the entire summer. Students are permitted to enroll for up to six credits during Summer Term.

Enrollments are counted three different ways on the following pages. The "Unduplicated Student Headcount" counts each individual student once per session. The count of "Course Grades Assigned" is a higher number, reflecting students who enroll in multiple courses in a given session. Courses that involve multiple sections that produce a single grade, such as biology courses with lecture and lab sections, are counted only once. Finally, the "Sum of Course Credits Earned" is the sum of all creits earned by students during the given term.

Unduplicated headcounts are broken out by gender. The few students with no recorded gender are listed as "Undeclared."

All counts are derived from grade records, including AU (audit) and W (withdrawal), and therefore reflect enrollment after the add-drop period. Grade records are derived from the IWU data warehouse, STUDENT_CREDIT_DIM, SCD_VERIFIED_GRADE.
