Track & Field Coaches and Athletic Trainers,

Please allow me to congratulate you and your athletes on qualifying for the 2013 NAIA Outdoor Track & Field National Championships! On behalf of Indiana Wesleyan University and the IWU Athletic Training Staff, we welcome you to Marion and are excited to have you here on our campus. I hope you enjoy your time here and have a memorable experience.

I am the Head Athletic Trainer at Indiana Wesleyan University, and the Medical Coordinator for the Championships. An organizational and informational meeting will be held for the coaches from 2:00-4:00 on Wednesday, May 22 in the Globe Theater in the Barnes Student Center. At that time, I will introduce myself, provide an overview of our services, and allow you to ask questions. If you are traveling with a Certified Athletic Trainer or Athletic Training Students, there will be a meeting for them at the same time in an adjacent banquet room.

The IWU Athletic Training Staff and Athletic Training Students, along with other Certified Athletic Trainers, will be providing the medical coverage for the meet. There will also be a Sports Medicine Physician from Central Indiana Orthopedics on site Thursday, Friday and Saturday afternoons and evenings. They will be on-call during the morning sessions.

The Medical Tent will be located on the south-east corner of the track just outside of the fence to allow easy access for your athletes. The Athletic Training staff will also be positioned throughout the venue during the meet to allow a quick response if necessary. In the Medical Tent we will have first aid supplies, as well as taping supplies for any needs your athletes may have. A variety of modalities will be available in the tent including moist heat, ultrasound, electrical stimulation, and ice. **Please note, if you are not traveling with a Certified Athletic Trainer, we will need a written request in order to use ultrasound and electrical stimulation.**

Athletic Training services will be available starting with limited hours on Tuesday. There is an attachment on the website that lists the specific hours Athletic Training services will be available. Please be sure to fill out and return the Team Medical Questionnaire so that we can be sure to provide your athletes with the best care possible. Again, if you are not traveling with your Athletic Trainer, we need a written request in order to treat an athlete with ultrasound or electrical stimulation.

I trust that your experience at IWU will be a positive one. We will do our best to meet the medical needs of your athletes. If you have any questions or concerns, please feel free to contact myself at mary.jacobs@indwes.edu or 765.677.3484.

Sincerely

Mary Jacobs, MA, ATC, LAT, CSCS
