

INDIANA WESLEYAN UNIVERSITY
Health Education Classroom Observation Form—2008 AAHE Standards

Administration and Purpose. This assessment is administered during the student teaching semester. You will be observed 5-6 times during your student teaching placements, twice by your health education content supervisor, and three or four times by your teacher education supervisor. Both supervisors will assess your teaching using this form.

This assessment has three related purposes. The first and perhaps most obvious is to document your ability to teach effectively. Teaching effectively is the minimum expectation for an Indiana Wesleyan teacher candidate. The second is to set a standard of excellence that you are expected to achieve. Each element within the eight domains of this assessment is an attribute or skill that successful teachers employ to enable students to become successful learners. We expect you to strive to reach the level of consistent excellence described in this assessment every day in every class you teach. The third purpose of this assessment is to create a space in which you can join with expert teachers in a collegial team, the purpose of which is to help you learn your craft by providing you with expert guidance and counsel in a supportive, nurturing environment. In addition to your cooperating teacher who will host and mentor you during your student teaching experience, your team also includes specialists from your content area and the teacher education faculty. Using this assessment document, your University content supervisor and teacher education supervisor will assist you in developing your teaching ability to the expected level of excellence.

Content of Assessment. The Student Teaching Observation Assessment is divided into eight sections that correspond to the eight domains of the Teacher as Decision Maker conceptual framework. This conceptual model emphasizes a strong knowledge base, and is composed of eight interdependent domains: content/subject matter expertise, personal development (morals and ethics), professional development, rights and responsibilities, methodology, management of time/classroom/behaviors, communication, and global/multicultural perspectives. The rubric elements within each of the eight domains describe the knowledge, skills and dispositions that we believe are highly correlated with teaching effectiveness and student learning and achievement.

In addition to being organized by the conceptual framework, this assessment also includes the following alignments:

- American Association of Health Educators (AAHE) 2008 standards. The IWU health education program is nationally recognized by AAHE; this assessment is one of several used to affirm the strength of our program by that organization.
- Interstate New Teacher Assessment and Support Consortium (InTASC). The InTASC Standards outline the common principles and foundations of teaching practice that cut across all subject areas and grade levels and that are necessary to improve student achievement. The ten InTASC Standards are incorporated into this assessment, and are divided into four categories:
 - ✓ Learner and Learning (InTASC Standards 1, 2 and 3)
 - ✓ Content (InTASC Standards 4 and 5)
 - ✓ Instructional Practice (InTASC Standards 6, 7 and 8)
 - ✓ Professional Responsibility (InTASC Standards 9 and 10)
- Diversity Thread. Teacher candidates are expected to teach all students well.
- Technology Thread. Teacher candidates are expected to integrate technology into their teaching as a means to improve student learning.

Criterion for Success. *Candidates must achieve a rating of Competent to pass this assessment. For this assessment, Competent is defined as 80% or more of all rubric elements scored as competent or higher. No domain or assessment element may be scored as Needs Improvement.*

InTASC Progressions

The intended use of these progressions is as a support tool for improving instruction. Their purpose is to provide descriptions of graduated levels of sophistication of teaching practice. Used in this way, they can be a formative assessment tool. The word “assessment” is derived from the Latin *ad sedere*, meaning “to sit down beside.” As the etymology implies, assessment (in contrast to evaluation) is primarily concerned with providing guidance and feedback for growth. The progressions provide a pathway and common language from which teachers can talk about their practice. The purpose of the progressions is to generate information for teachers to self-assess against and reflect upon, and for mentors and coaches to use to provide feedback in order to improve professional practice.

As a tool that provides a common language about how to develop and grow effective teaching practice, the progressions can be used by a range of stakeholders at different stages of a teacher’s career. For instance, **Preparation program providers and cooperating PK-12 teachers** can use the progressions to inform the preparation curriculum, including what content focus is included and how coursework is sequenced, how experiences during clinical practice should be scaffolded, and what should be included in a “bridge plan” for continued growth for pre-service teachers as they move to in-service and their induction period.¹

NOTE: The following InTASC progressions have been added to this pedagogical assessment rubric. These progressions describe the increasing complexity and sophistication of teaching practice for each core standard across the three developmental levels. Even though the InTASC Progressions are included in what is normally a summative assessment, their use is to be formative only. Assessors and teacher mentors should point candidates to these standards, in the process helping them both understand where their current practice places them against these expectations, and also what yet must be accomplished to improve their instructional practices.
